

Homework Leaflet Year 4 Autumn 1 'Explore Romans'

Name:

Homework project due in by: 7th November 2024

Children work hard at school and they need time in the evenings and weekends to play and learn in different ways. They need time to take part in family activities and also to be able to join community organisations and teams.

Homework is of most benefit to the learner when it is a chance to:

- Talk about learning with parents and carers
- Apply learning in a practical context
- Spend time on practicing facts and skills that need a lot of repetition
- Make choices and decisions

Essential Weekly Homework

These three homework tasks should be done every day or as often as you possibly can:

1. Reading

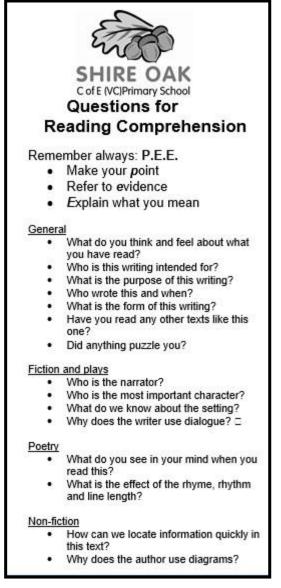

Children in KS1 and some children in lower KS2 have a <u>school reading</u> <u>book</u>. They start by reading to their grown-ups who will write a comment in the reading journal. As children get more confident it may be that instead they discuss the book with an adult who can ask them questions about what they have read. Our Reading Comprehension bookmark can help with thinking of questions.

Children will also bring home a <u>school</u> <u>library book</u> that they have chosen to read for information or pleasure.

Children can also read their <u>own</u>

books from home or the local library. To

choose a book that is the right level of difficulty when children are still learning to read ask them to put down one finger for each word they can't work out on a page. O fingers is too easy, 5 is too hard. 3 is probably just about right.

2. Practising key number facts

Learning key number facts off by heart will help children to be more confident and fluent mathematicians. These could be learnt by memorising, and they could also be practised in fun ways e.g. by playing games. You can also find lots of activities to practise these facts on websites including https://www.topmarks.co.uk/maths-games/daily10 https://www.topmarks.co.uk/maths-games/hit-the-button

Key number facts for Year 4 this term

- Practising the x table facts from the previous year (x3, x4, x8). See your child's timestable score given in July to know which one they need to practise the most.
- Find 1, 10, 100 or 1000 more or less than a given number (up to 4 digits).
- Round any number (up to 4 digits) to the nearest 10, 100 and 1000.
- Recall number bonds up to 100.

3. Learning sounds and spellings Children will have spellings to practise this half term that will be checked in school and used in class work. These will be related to:

LÓON (S STERS	
1	COVER	WRITE -

- Spelling rules they are learning
- Common exception words that they need to know off by heart

A good way to learn spellings is LOOK, SAY, COVER, WRITE and CHECK.

Optional Half Termly Homework

If your child needs more ideas for things to do at home, try these:

- Maths Activity Play Countdown like on TV. Take 4 large number cards with the numbers 25, 50, 75 and 100 on them and 3 sets of cards with numbers 1-10 on them. Choose 6 cards (face down first) then roll some dice to generate a 3-digit number. and see who can make the number (or get closest to it) using the given number cards.
- Writing activity Create your own poem about the Romans. It could be any kind of poem rhyming, acrostic, haiku...
- Reading/research activity Our class river is the Ganges. Find out interesting facts about this river to share with the class.
- Useful websites or online activities are Mathletics, Reading Eggs, Phonics play, BBC websites

Don't forget that telling a grown up about their learning and explaining new knowledge and skills is the very best homework a child can do!

Half Term Project

We now know how Rome came to be (through the story of Romulus and Remus.) Imagine if you could create a new country and name it after you. What would it be called? What would it look like? What rules would you have in place? What celebrations would you have? You could draw a picture of it, design a leaflet advertising it, you could even build a model of it... Be Creative!

Children should use their own ideas and skills for this because we want them to build stamina over a period of time and to be creative in how they respond. They can work with help or independently. This work will be shared in class and certificates will be awarded for projects that are completed.
